*Allowance*

1. Claims 1-29 will be allowed.
2. The following is an examiner's statement of reasons for allowance.

The prior art references most closely resembling the applicants claimed invention are Flint et al (U.S. 6,453,419) and Reid (U.S. 6,182,226).

First Flint teaches a graphical user interface for conveniently defining access control rules for a firewall. Figs. 4 and 5 of Flint each illustrate an access control rule. In terminology of Flint, "every access rule must consist of two specific nodes. The first, services node 60, decides which service(s) the rule will control. The second From/To node 62 determines the source region and destination region of the connection." Thus the term "nodes" in Flint refers to nodes in a flow chart, as apposed to nodes in a network. Whereas Flint failed to disclose the claimed limitations require generating a gateway-zone graph that models said network based on said packet filtering configuration file. The claimed limitations further requires that the gateway-zone graph has "at least one gateway node corresponding to said at least one gateway and at least two zone nodes". These limitations are incorporated into all of the independent claims (claims 1, 9, 12,19,27,28,29).

Second Reid teaches a method for analyzing at least one gateway in a network. The graphical representation is created by a user to define the access control rules for a given firewall. The

Art Unit: 2145

graphical representation is then used to generate the access control commands which will be implemented by firewall. Reid failed to disclose the claimed limitations require generating a gateway-zone graph that models said network based on said packet filtering configuration file. The claimed limitations further requires that the gateway-zone graph has "at least one gateway node corresponding to said at least one gateway and at least two zone nodes". These limitations are incorporated into all of the independent claims (claims 1, 9, 12,19,27,28,29).

In summary, the Examiner submits that there is no motivation to combine the aforementioned references; therefore, claims 1-66 have been deemed allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
